

com.snail.personinfo.Main
Activity.IsCorrectFillFields

```
graph LR; A[com.snail.personinfo.Main Activity.IsCorrectFillFields] --> B[com.snail.personinfo.logger. Logger.LogError]; A --> C[com.snail.personinfo.logger. Logger.LogInfo];
```

The diagram illustrates a call from the `com.snail.personinfo.Main Activity.IsCorrectFillFields` method to two logging methods in the `com.snail.personinfo.logger` package: `Logger.LogError` and `Logger.LogInfo`. The source method is highlighted in a grey box, while the target methods are in white boxes. Blue arrows indicate the direction of the calls.
